

# FUN WAYS TO FEED a Variety of Hays

**B**y now, you've probably heard a lot about the benefits of offering a regular variety of hays to your pets. In addition to encouraging natural foraging behaviors & keeping mealtime fun & interesting, regular access to a variety of hays helps prevent pets from becoming picky eaters. So, what are some fun ways to mix & match your pet's favorite Oxbow hays? Here are some of our favorite flavor & texture combinations:

## TIMOTHY + ORCHARD:

### The Classic Blend

Pets love this enriching, balanced blend of our two most popular hays. For added convenience, you can purchase this combination pre-blended as our Hay Blends - Western Timothy + Orchard!

## ORCHARD + BOTANICAL:

### The Soft & Sweet

How do you make the soft texture & sweet flavor of Orchard Grass even better? Mix in some Botanical Hay! This herb-infused combo is sure to brighten even the pickiest eater's day!

Your pet should eat a pile of hay the size of its body daily.

## OAT + ORCHARD:

### Crunch & Munch

Two favorites from opposite ends of the texture spectrum! Pets love our nutty, crunchy oat hay & our soft & sweet Orchard Grass. Blend these two texture stars together for a perfect blend of crunchy & soft.

## ORGANIC MEADOW + TIMOTHY:

### The Nature Lover

Our Organic Meadow Hay is a favorite of pets & Mother Nature. Mix in some Western Timothy to create a crunchy, fiber-packed powerhouse that you can feel good about! The perfect combo for that nature lover in your life!

## Mixing Tip:

Add a pinch of alfalfa to make any hay combination even more enticing for your pet! Just remember that adult herbivores should only receive alfalfa in small quantities.

## BOTANICAL + ORGANIC MEADOW:

### Organic Herb Garden

This savory, nature-inspired blend will evoke imagery of lavender fields as far as the eye can see. Blend Mother Nature's favorite hay with the wonderful herbal goodness of Botanical Hay & you've got yourself an environmentally-friendly winner!
